CONTROL HORARIO

2. No se puede leer la propiedad 'names' de undefined (se necesitan los nombres de apellidos del doctor)

The screenshot shows a web browser window with the address bar displaying `imm-citas-front-dev.s3-website-us-east-1.amazonaws.com/appointment-schedule`. The page content is mostly blank, with a small "404" visible in the top right corner. The browser's developer console is open, showing several error messages. The first four are "Failed to load resources: the server responded with a status of 404 ()". The fifth error is a detailed JavaScript error: "TypeError: Cannot read properties of undefined (reading 'names')". The error stack trace includes the following frames:

- `index-31Dyf60A.js:40`
- `Object.accessorFn (index-31Dyf60A.js:551:98229)`
- `Object.getValue (index-31Dyf60A.js:530:6166)`
- `Object.getValue (index-31Dyf60A.js:530:380)`
- `Object.r [as renderValue] (index-31Dyf60A.js:530:275)`
- `at cell (index-31Dyf60A.js:530:46148)`
- `at rA (index-31Dyf60A.js:38:12534)`
- `at Pg (index-31Dyf60A.js:40:44058)`
- `at gg (index-31Dyf60A.js:40:37290)`
- `at K9 (index-31Dyf60A.js:40:39718)`
- `at GM (index-31Dyf60A.js:40:39578)`

The error is marked as "Uncaught".
